- Creating and managing business information.
- Adding invoices for a product or a service.
- Creating a sales list.
- Generating reports of the financials.
- Clients, products, vendors and consignments.
- Invoices, sales, consignments and invoices management.
- Receipts and receipts management.
- Basic PDF printer support.

Craft Maker Pro is an efficient management utility whose main purpose is to assist business owners in better

organizing their work and correctly pricing their products. The application is specifically designed for arts and crafts businesses, such as potteries, scrapbooking, jewelery design, knitting and various other small or medium sized companies dealing in similar activities. Craft Maker Pro allows users to enter their company's information, such as name, telephone number, complete address, web page and email, logo, hourly rate, tax rate, as well as default measurements. These will later be used in order

to create 'Invoices' for any sold product. In the 'Inventory' section of the program, users can add the 'Parts' and 'Pieces' they work with in their business, as well as the 'Bill of Materials'. Here, users can also add the 'Vendors' they resort to when in need of supplies. The 'Sales' section enables users to keep track of the items they sell as well as the 'Consignments' and sort the 'Invoices' generated with each new sale. An 'Invoice' will be assigned directly to a specific 'Customer', so users need to also keep a record of

their clients. By constantly entering the bought materials and supplies, as well as registering the sold products, users can generate 'Profit / Loss Report' between a specific date range, so they can know where they stand in terms of productivity at the end of each month or trimester, for instance. Additionally, this enables crafts business owners to better estimate the cost of their work and price their products accordingly, so they can be sure to make a profit. While Craft Maker Pro can be

quite useful, it is not the easiest of programs, and requires a little perseverance to figure what goes where. Nonetheless, the application can prove very handy in assisting users with the financial aspects of their company. Craft Maker Pro

Description: Main features:

- Creating and managing business information.
- Adding invoices for a product or a service.

What's New in the?

* Craft Maker Pro is a business management utility specially designed for crafts businesses,

such as potteries, scrapbooking, jewelery design, knitting and other small or medium sized businesses dealing in similar activities. * The application helps users to better organize their work, by enabling them to keep track of the exact details of the items they work with, their prices, their units and dimensions, as well as the units, dimensions and prices of the purchased supplies and their clients. * Craft Maker Pro's main purpose is to assist crafts businesses, such as potteries, scrapbooking, jewelery design,
