Open autocad. Open settings and choose "File->Preferences...". Set the "TabNavigation" field to "Bookmarks" (Note that this method is not 100% secure and can be easily detected by the software's spy tool). Set "Default" in the "Show navigation" field. Click on "OK" and "Apply" A: You need to install/activate a version of Autodesk Design Review or Studio that has the Bookmarks tab. It's required for this functionality. If you want to use other types of tabs, you can disable the Bookmarks tab, but this still won't work unless you've activated the design review or studio version of Autocad that has the Bookmarks tab. More info: Hmmm… the flat and low foundations of the M74i can be a nuisance when using large, low-angle buckets. The maximum dry run is even more of a problem. An HFC 150 would solve both problems! This photo shows the new wheels mounted on the TS5X. They are rated at 75 miles/hr, so that's good news, but the spurs are really the limiting factor for a long-lasting wheel! I couldn't find a spacer to push the drum up higher, and of course there's no place to mount a different size sprocket. If the new truck is to be used for short-haul street driving, then the new wheels would be the perfect choice. If it's to be used for long-haul trips, then an M60 will be ideal for the additional traction, and the HFC 150 will give me something to look forward to when I'm running late to an appointment! I've been having a few issues with the new wheel and tire combo, and here's some of the problems I've been having: - When I was told to change the M75's to an M60, I'd envisioned a massive performance increase. Unfortunately, the increased speed has not affected the tire performance, and this is a little annoying to me. (The tires still have a 4-year warranty, so I'm not losing any money so far). - The PSS 4 wheel alignment made
