Gnumeric Portable

This is the portable
edition of Gnumeric, a
spreadsheet processing
utility that includes a
few powerful options
for all types of users. It

supports a wide range of formats, such as CSV, HTML, TXT and ODS. As installation is not a prerequisite, you can extract the program files somewhere on the hard disk and click the executable to run. It is also possible to move Gnumeric to a USB flash drive or similar storage unit, in order to run it on any machine

with minimum effort. What's more, the Windows registry does not receive new entries, and leftover files do not remain on the hard drive after removing the program. The interface is comfortable to work with, as it resembles the one of Microsoft Excel, and Gnumeric contains a few templates. You can

insert comments,
charts, images,
functions, function
wrappers, hyperlinks,
and timestamps, use a
search and replace
function, as well as
format cells when it
comes to the number
mode, alignment, font,
border, background,
protection mode,
validation, and
conditions. Other

options of Gnumeric let you manage sheets and plugins, enable an auto correct function, recalculate iteratively to find a target value, run simulations, as well as generate statistics (e.g. dependent observations). The program has a good response time and works smoothly, without causing the

operating system to hang, crash or pop up error dialogs. It uses low CPU and RAM, so it doesn't slow down overall performance. All in all, Gnumeric contains some rich features for a spreadsheet processing tool. Key Features: The program is very easy to use, as it resembles the one of Microsoft Excel.

It has plenty of templates, such as bookmarks, charts, hyperlinks, images, and timestamps. You can open different files, modify their sheets, select data from the formulas, add tables, and format them.

Gnumeric also has some more advanced options, such as the ability to perform

simulations, recalculate them iteratively, add conditional formatting, import and export, filters, styles, and plugins. You can also manage sheets, insert a comment and keywords to search for them, and organize your work by folder. The program is fast, as it doesn't slow down the operating system or the screen,

and it uses low CPU
and RAM. Gnumeric
