Bundesliga players Category:Expatriate footballers in the Czech RepublicScalable fabrication of micropatterned surfaces by dip-pen lithography with conductive inks. Micropatterned surfaces are widely used as model surfaces for research into cell migration and adhesion. Their usefulness is limited, however, because of the need for sophisticated equipment to make such surfaces, and because the inability to easily fabricate the surfaces with a large area. Here, we report a simple method for the fabrication of micropatterned surfaces that makes use of the ability of a chromium-based electron-
