Contents AutoCAD is a desktop CAD/drafting application designed for use by architects, mechanical engineers, draftsmen, and other designers. AutoCAD is the most widely used CAD software application in the world, used by designers in over 150 countries. Product Description The original versions of AutoCAD were developed in the early 1980s. AutoCAD LT is a less expensive version of AutoCAD. AutoCAD is widely used in industry and education. History AutoCAD was developed in the early 1980s by Autodesk as a response to a request from an architecture firm, Fontbonne Associates. The AutoLISP (a variant of Lisp, a general purpose programming language) software developed to run on the Apple II platform for a computer graphics simulator for AutoCAD was based on a module for Lisp Machine, the precursor to the Lisp Machines.[1] Originally, the primary target was Apple's own Lisa. Later, it was available for IBM PC compatibles, with its first release on DOS. It was also ported to the CGS (later known as Mac) in the early 1980s, and later to Windows. Today, it is available for both Intel- and PowerPC-based Macintosh computers, the latter through the open source GraphicsMagick project, and is available for x86 (Windows), OS X and Linux systems. Autodesk says that the first person to use AutoCAD was Saul Navarro of Fontbonne Associates (now Fontbonne Design Group) in 1980.[2] The first version of AutoCAD, AutoCAD 1.0, was released on December 4, 1982.[3] In December of that year, the first ad appeared in the pages of Popular Electronics magazine.[4] AutoCAD 2.0 was released in May 1983. It included a full-color bitmap mode for Windows, with a 96-color palette, a bitmap editor, 2D barcode support and a new type of text called "typewriter." The Macintosh and Macintosh-based plotters from Axonix and Menta Graphics became the first CAD plotters to be able to plot in color.[5] AutoCAD 2.1 was released in June 1984.[6] It introduced parallel tables, a new project template called the "house" and a new feature for editing 3D objects called "extrude."
