When I call this method it will return a JPG. I want to call that method and then return the response from `_getProfilePic()` in a parameter of a new method. The other method needs to get the response from `_getProfilePic()` and then send it to the user. When I run the code below, it returns the default image for `_getProfilePic()`.

```
var _getProfilePic = function(response, success) { if (response.error) { success(false); } else { success(true); } }; var _sendProfilePic = function() { $.ajax({ url: 'user/profile_pic', data: { profilePic: profilePic }, success: function(response) { _getProfilePic(response, function(success){ if (success) { alert('success');
```
